

Miele

Eco Line

Miele, the premium manufacturer of domestic appliances, are proud to launch two new eco-friendly vacuum cleaners to their range.

Miele Hybrid

The most exciting new development in the Miele range is the new Hybrid Vacuum cleaner, the first cylinder vacuum cleaner which combines mains-power and battery operation. This means you can charge the vacuum and carry it cordless to those hard to reach places such as the stairs, the garage and the biggest chore of all... the car! No longer do you need to risk passing cables through windows and door ways, simply charge the Miele Hybrid vacuum and away you go! The Miele Hybrid uniquely combines first-class cleaning performance with the freedom and unrestricted range and mobility of a cordless vacuum cleaner.

Miele Eco-line

The Miele Eco-line sucks dirt not energy! The Miele 1300 W Eco-line Green model is notable for the ability to remove dust and dirt from all floor types using the same amount of energy, such as when cleaning smooth and hard flooring to heavier duty carpets or deep pile rugs. Other features of the Eco-line Green includes the Super Air Clean filter, six-stage rotary selector for different suction power for different tasks, a "Silence" mode for when you want to clean without bothering others, and a full assortment of on-board accessories that hide within the vacuum. Miele has been awarded over 100 national and international design prizes over recent years for its products, frequently accompanied by such distinctions as "Most Trusted Brand" or "Best of Category".

Miele Gallery

The Miele Gallery, boasts a state of the art 5,000 sq. ft showroom positioned alongside the Independent Newspapers Building on the N7 at Citywest, Dublin 24. Miele has created the perfect environment where a showcase of all products are on display for consumers to try before they buy. Why not drop into the Miele Gallery and test drive the latest technology in the Hybrid vacuum or check out the latest range of Miele products.
